

Installation: *Effect on the Ghost Train Ride*

Time: Fixed installation, installed April 2007

Place: Ghost Train in Linnanmäki amusement park, Helsinki, Finland

Customer: Linnanmäki / Lasten päivän säätiö

FogScreen projection screen is used to provide one of the “scary” effects on the Ghost Train.

”

Linnanmäki wants to be a pioneer in everything, and just to give an example, the first hamburgers in Finland were sold at Linnanmäki. Every year there are four to five new or updated rides. In this case we had been looking for something new for the Ghost Train for some time now and when we saw the FogScreen product for the first time, we knew right away that this was the solution we had been looking for, this is something huge.”

Risto Räikkönen

CEO, Linnanmäki / Lasten päivän säätiö
